SUITABLE PRINTING TECHNOLOGIES FOR MUGS:

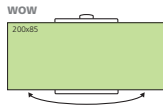

- DIRECT PRINT WITHOUT FIRING**
 The technology is suitable for one-colour logos in exact Pantone colour. Direct print is more economic than transfer print. This technology does not allow register print.
- TRANSFER PRINT WITH FIRING**
 Logos can be printed in multiple colours and all round. Moreover, it allows printing inside the mug, on the bottom and on the handle.
- SUBLIMATION PRINT**
 Sublimation is a digital technology applicable to mugs with special surface finishing. It allows most realistic colours, with high definition in photo quality. Sublimation applies to selected mugs on pages 189, 190 and 206.
- HYDROGLAZE**
 Hydroglaze allows mugs to be coloured in any Pantone colour with organic colour sprayed on the mug. Hydroglaze can be made in matt or glossy finish. The mug can further be branded. Hydroglaze applies to mug PANTHONY OWN on page 201.
